

Single Vision Lens

A new frontier in single vision lens

Thinner, Flatter, Prettier

AO mark
Each lens is individually marked with an AO logo to authenticate lens quality.

100% UV protection
AO high index and Transitions lenses offer 100% UV protection.

Anti-reflection coating
Lorem ipsum dolor sit amet, consectetur adipiscing elit.

Super hydrophobic coating
The super-slippery top coat repels dirt, grease and dust, making lenses easier to clean and maintain.

Anti-Static
Anti-Static properties help to keep the lenses clean.

Progressive lens

AO One Easy

AO One Easy HD

Both progressive lenses incorporate the patented Bipolar Design and Dirichlet's smoothing principal for easy adaptation and easy wear.

Features

- Enhanced periphery vision
- Balanced viewing zones
- Smooth distribution of power
- Optimized corridor length

Benefits

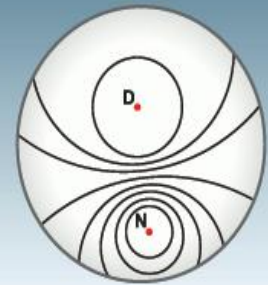

- Low distortion ensures maximum comfort
- Easy wearing experience
- Easy adaptation
- Greater choice of frame styles

All Distances 1 Lens

Law of Nature

AO BIPOLAR
DESIGN TECHNOLOGY

AO Unique Design Components

Patented Bipolar Design Technology incorporates 2 features:

- **Patented Bipolar Design**
The distance and near vision power curves converge concentrically on the distance and near power points.
- **Dirichlet's Smoothing Principal**
Optimization of spacing between the power and astigmatic isocurves provides the most uniform and smoothest flow of power between the distance and reading levels.
